

## Lab 1

---

Each item includes the following information: `code` (string), `name` (string), `price` (float).

Complete a program with a simple menu that allows users to manage a list of items with the following functions:

1. Add a new item
2. Update the price of a item
3. Delete a item
4. Search for a item by the item's code
5. Display items in ascending order of price
6. Quit
